

1. Add this script in your HTML (before `</body>`)

```
html
<script src="script.js"></script>
</body>
</html>
```

2. Create a file named `script.js` and add:

```
javascript
// Show a welcome alert when the page
loads
window.onload = function() {
  alert("Welcome to my portfolio!");
};

// Simple form validation
document.querySelector("form").addEventListener("submit", function(event)
{
  const name = document.querySelector("input[name='name']").value;
  const email = document.querySelector("input[name='email']").value;

  if (!name || !email) {
    alert("Please fill out all required fields.");
    event.preventDefault(); // Prevent form from submitting
  }
});
```
